Crop production

2025 *

Agricultural land used in 2025 amounts to 251,673.1 hectares, representing an increase of 1.4% compared to 2024. Within the total utilized agricultural land, permanent meadows and pastures dominate with a share of 92.7%, while arable land accounts for 3.4%, permanent crops 3.7%, and kitchen gardens 0.2%. Compared to 2024, the area of permanent meadows and pastures increased by 1.7%, while a decrease was recorded in kitchen gardens by 31.6% and arable land by 4.3%, whereas permanent crops remained at the same level as in the previous year.

Total maize (corn) production for grain in 2025 amounted to 3,586.2 tonnes, which is 3.6% higher compared to 2024. An increase in production was also recorded for the following crops: beans (by 140.0%), melons (4.6%), and watermelons (by 3.6%).

Compared to 2024, total production increased for apples (by 0.2%), while production decreased for plums, pears, peaches, mandarins and olives.

Total grape production in 2025 increased by 18.8% compared to the previous year.

Graph 1. Utilized agricultural area

**)In accordance with the Statistical Office's Revision Policy, the data have been revised.*

METHODOLOGICAL EXPLANATIONS

Legal basis

The survey is conducted on the basis of the Law on Official Statistics and the System of Official Statistics (Official Gazette of Montenegro No 18/12 and 47/19), and in accordance with the Annual Plan of Official Statistics for 2025 (Official Gazette of Montenegro No 129/24).

Objective of the survey

The statistical survey on achieved yields of late crops, fruit and grapes (PO-33) collects data on agricultural land areas by categories of use, sown and harvested areas by individual crops, and the achieved production of arable crops, vegetables, fruit and grapes.

Method and time of data collection

The survey was carried out in the period from 24 November to 20 December 2025. Data were collected through interviews and direct data entry using an application model on electronic devices. In the survey forms, data were recorded for a reference period of one year, i.e. for the period from 1 December 2024 to 1 December 2025.

Coverage of the survey and reporting units

The survey covers family agricultural holdings and business entities in accordance with the applicable criteria.

Data on achieved yields of late crops, fruit and grapes for family holdings were obtained on a sample basis. The survey covered all companies, cooperatives and other legal entities engaged in crop production, and the data were collected using the interview method.
