Metodološka objašnjenja / Methodological notes

Indeks proizvodnje šumskih sortimenata / Index of production of forests assortments

Proizvedeni sortimenti / Production of forests assortments

ŠUMARSTVO**Izvori podataka i obuhvatnost**

Podaci se prikupljaju mjesečnim istraživanjem o proizvodnji šumskih sortimenata u državnim šumama ŠUM-22. Ovim istraživanjem su obuhvaćena sva preduzeća koja u državnim šumama vrše proizvodnju šumskih sortimenata, tj. područne jedinice Uprave za šume.

Definicije

Indeks fizičkog obima iskorišćavanja šuma obračunava se na osnovu podataka o proizvodnji šumskih sortimenata, prema nomenklaturi proizvoda i ponderacionih koeficijenata. Količine predstavljaju neto drvenu masu sortimenata izraženu u kubnim metrima. Za izračunavanje indeksa proizvodnje šumskih sortimenata kao koeficijenti ponderacije koriste se prosječne prodajne cijene proizvoda.

FORESTRY**Data sources and coverage**

The data are collected on the basis of the monthly survey on production of forest assortments in state forests. This survey covers all business entities that carry out the production of forest assortments in the state forests, i.e. local units of the Forest Administration.

Definitions

The physical volume index of forests exploitation is calculated on the basis of data on the production of forest assortments, according to the present nomenclature of products and weights coefficients. Quantities represent net wood mass of assortments expressed in cubic meters. In order to calculate the index of forest assortments production, average purchase prices are used as weighting coefficients.
