Date of publishing:
28 July 2022

Price indices of industrial products from import

The first quarter 2022

Prices of industrial products from import in Montenegro in the first quarter of 2022 compared with first quarter of 2021 increased for 12.8%. Observing the sectors of Classification of activities 2010, compared with first quarter of 2021, sector *Mining and quarrying* increased for 26.9%, while sector *Manufacturing* increased for 12.8%, compared with first quarter of 2021.

Prices of industrial products from import in Montenegro in the first quarter of 2022 compared with fourth quarter of the previous year increased for 4.1%. Observing the sectors of Classification of activities 2010, compared with fourth quarter of 2021, sector *Mining and quarrying* increased for 1.0%, while sector *Manufacturing* increased for 4.1%, compared with fourth quarter of 2021.

Graph 1. Growth rate of import prices, in %

- ❖ **Annual growth rate** – change in prices in a current quarter compared with the same quarter of the previous year, in %.
- ❖ **Quarterly growth rate** – change in prices in a current quarter compared with the previous quarter, in %.

Table 1. Price indices of industrial products from import

NACE Rev.2	Name	<u>IQ 2022</u> Ø 2021	<u>IQ 2022</u> IVQ 2021	<u>IQ 2022</u> IQ 2021
	TOTAL	108.3	104.1	112.8
B	Mining and quarrying	115.7	101.0	126.9
07	Mining of metal ores	115.7	101.0	126.9
C	Manufacturing	108.3	104.1	112.8
10	Manufacture of food products	110.6	108.3	115.0
11	Manufacture of beverages	101.7	101.7	101.7
12	Manufacture of tobacco products	106.3	106.3	106.3
13	Manufacture of textile	100.4	99.9	101.0
16	Manufacture of wood products, cork and similar	100.9	100.6	101.0
17	Manufacture of paper and paper products	100.1	100.1	100.1
19	Manufacture of coke and refined petroleum products	121.8	107.6	134.0
20	Manufacture of chemicals and chemical products	102.5	102.1	102.4
21	Manufacture of basic pharmaceutical products and preparations	100.0	100.0	99.9
22	Manufacture of rubber and plastic products	100.1	100.0	100.0
23	Manufacture of other non-metal minerals	104.0	103.2	104.9
24	Manufacture of basic metals	109.1	103.6	122.2
25	Manufacture of metal products except machinery	116.6	107.1	128.8
27	Manufacture of electrical equipment	105.2	102.1	112.4
28	Manufacture of other machinery and equipment	105.2	100.0	111.0
29	Manufacture of motor vehicles	100.0	100.0	100.0

Table 2. Special aggregates

BY PURPOSE OF CONSUMPTION	<u>IQ 2022</u> Ø 2021	<u>IQ 2022</u> IVQ 2021	<u>IQ 2022</u> IQ 2021
Energy	121.8	107.6	134.0
Intermediate goods, except energy	108.7	105.0	113.7
Capital goods	103.5	101.8	104.5
Durable consumer goods	104.9	100.2	115.8
Non-durable consumer goods	103.4	103.3	105.2

METHODOLOGICAL NOTES

The purpose of statistics on import price indices is to collect the data on monthly price changes of industrial products from the import. Purchase price of industrial products from import is the price of a good delivered at the frontier of the importing country, including transportation costs, insurance charges, and any other costs incurred to that point (CIF price) that influence on the unit price of a product.

Price indices of industrial products from the import represent important economic indicators which can be used as an inflation measure, as time series deflators, especially for needs of national accounts and as an instrument for harmonizing prices when different purchase and sale contracts are concluded.

This survey includes companies - importers of industrial products covered by sectors B and C of [Classification of activities 2010](#), which substantially and structurally fully corresponds to NACE Rev. 2. The sample is determined by three criteria: selection of products with significant import values; selection of enterprises importing these selected products, selection of representative items in cooperation with the reporting units.

Special aggregates:

Energy – Includes activities of extraction, production, processing and distribution of energy.

Intermediate goods – Include products that are final product of manufacturing process, but can also be used as an input to other production processes.

Capital goods – Include heavy equipment which require relatively large investments, and are purchased for use over a long period of time.

Durable consumer goods – Include products for the mass market and are intended to last for several years.

Non-durable consumer goods – Include products for mass consumption, purchased by consumers for daily or frequent use.

Data are published according [Statistical Release Calendar](#).

The last published data are considered preliminary, and becomes final within the defined deadline, as foreseen by the Statistical Release Calendar.

When using the data, state:

"Data source: Statistical Office - MONSTAT"

More data, as well as detailed methodological notes can be found in the section: [Import Price Index](#)
