## METHODOLOGICAL NOTES

Industrial production is one of the most important indicators, and used as a basis for decision-making in the field of economy.

Industrial production survey is aligned with Regulation 3294/91, and the concepts and definitions prescribed by this regulation are applied, which ensures data comparability. It is conducted on a residential basis. Industrial production statistics are presented annually and are based on the statistical classification - PRODCOM list, which includes a large number of products.

The Statistical Business Register is used as a framework for inclusion in this survey. PRODCOM statistics include industrial production (with the exception of military products and some energy products) carried out by enterprises classified in sectors B, C and E of NACE Rev. 2, as well as parts of companies that are classified in other sectors of the Classification of Activities, and they satisfy the criteria provided for this survey.

Data are published according to the [Statistical Release Calendar](#).

According to the Revision policy of the Statistical Office, the final data shall be published with the date defined by the Statistical Release Calendar.
