METHODOLOGICAL NOTES

Data on fixed capital investment are collected by survey "Annual Report on Fixed Capital Investments" (INV-01) from business entities in the country if they are direct investors. The concepts and definitions applied in this survey correspond to the concepts of the European system of National Accounts (ESA 2010). Data are collected according to a stratified sample and stratification is done according to the Classification of Activities 2010 (Classification of activities 2010) and the number of employees.

The survey are covered all large and medium-sized enterprises, while small ones were chosen by random sample.

The data are aggregated according to the organizational principle (according to the main activity and the residence of the investor) and are published at the sector level.

Investments in fixed capital are purchases made by business entities in order to acquire new assets, increase the values of or replace existing fixed assets (dwelling buildings, other buildings and structures, machinery and equipment, cultivated biological resources and intellectual property products: research and development, mineral exploration and evaluation, computer software and databases, entertainment, literary or artistic originals and other intellectual property products).

Realized investment during the reference year is the value of actual construction, building or procurement of facilities, equipment etc., regardless of whether they are completed or not and payment made.

Acquired investments goods can be new or already used, purchased or received with no compensation from others in the country or abroad or self-produced. All investments into new capacity extensions, reconstruction and modernization of existing or replacement of old ones, ruined capacities are included. Investments do not cover expenditures spent for regular and current maintenance of existing infrastructure.

Data are published according [Statistical Release Calendar](#).

The last published data are considered preliminary, and becomes final within the defined deadline, as foreseen by the Statistical Release Calendar.
