METHODOLOGICAL NOTES

The minimal consumer basket refers to the household consumption, including food and non-food products, and services which ensure the maintenance of life and working capacity of household members following the minimal recommendations of WHO and USDA Food Guide 2010, requirements of minimal value of caloric intake of 2211 Kcal, per day, per person.

The minimal consumer basket based on Household budget survey and recommendation of World Bank.

The total value of minimal consumer basket for four-member household comprises minimal monthly expenditures on food and non-food products and services.

For calculating the value of minimal expenditure for food and non-alcoholic beverages, an average price in current months and monthly quantity in kg for four-member household are used. For calculating the value of non-food products indices of consumer prices (CPI) are used.

When using the data, state:

"Data source: Statistical Office - MONSTAT"
