METHODOLOGICAL EXPLANATIONS

The data in this release are a result of statistically processed annual reports provided by primary schools. The statistical survey covered all primary schools, regardless they are central primary schools or separate departments working in accordance with the programme of Ministry of Education, and Sports. The data on primary education refer to the beginning of school year 2010/11.

School year is a period within which the regular classes are given and other types of educational work. School in the education statistics is a group of pupils organised in one school unit, with one or more teachers giving classes of certain type by defined programme of instruction, regardless the school is independent, regional department or department in other type of school. School is also considered a territorially separate unit in the composition of primary school.

Department is a group of pupils instructed in the same time and in the same premise during a school year by a teacher or several teachers in a successive manner.

Class is level of education under which pupils obtain a certain scope of knowledge in a certain time period, during one school year, and in accordance with the programme of instruction, and programme of appropriate School.
