Labour Force survey

2019

This release contains data received through the Labour Force Survey conducted in the 2019 and the observation period was from January to December 2019. The interviewing was done in 8 442 households on the territory of Montenegro. There were collected data about demographic characteristics for all members of the households (24 505 persons were surveyed) and in addition also data about economic activity for persons aged 15 and more (21 157 persons).

According to the data for four quarters in the 2019, there were 287.3 thousands of active populations in Montenegro, out of which there were 243.8 thousands of employed persons or 84.9% and 43.4 thousands of unemployed or 15.1%. The number of persons in employment in comparison with the previous year has increased by 2.7% and the number of unemployed persons in comparison with the previous year has increased by 2.1%.

There were 213.1 thousands of inactive populations. The number of inactive in comparison with the previous year has decreased by 3.1%.

The activity rate for the 2019 is 57.4%, the employment rate is 48.7%, the unemployment rate is 15.1% and the inactivity rate is 42.6%.

Chart 1 Working age population by status in activity

(in thousands)
Out of total number of labour force (active population), there are 159.8 thousands or 55.6% of men and 127.5 thousands or 44.4% are women, while 128.0 thousands or 60.1% of inactive persons are women and 85.1 thousands or 39.9% are men. Out of total number of employed persons, there are 136.3 thousands or 55.9% of men and 107.5 thousands or 44.1% are women. When unemployed persons observed, there are 23.5 thousands or 54.0% of men and 20.2 thousands or 46.0% are women.

The highest number of labour force (active population) refers to the age group 25-49 years (174.6 thousands). An age group with the highest number of inactive persons is the 65+ group (69.9 thousands of inactive persons). The highest number of employed persons refers to the age group 25-49 years (146.7 thousands). Also, the highest number of unemployed persons is persons of the same age group (27.9 thousands of unemployed persons).
The educational structure of labour force (active population) shows that 62.0% persons have finished the secondary school, followed by persons who have graduated tertiary education 29.0% and persons who finished the primary school or lower education 9.1%.

The highest share in the educational structure of inactive persons has persons with completed secondary education, 51.6%; then 38.5% of persons with primary school or lower education and remaining 9.9% have graduated tertiary education.

The educational structure of persons in employment shows that the 61.8% persons have finished secondary education, followed by persons who have graduated tertiary education, 30.2% and persons with primary school or lower education 8.0%.

The educational structure of unemployed persons shows that 63.1% persons have finished the secondary education, followed by persons who have graduated tertiary education 21.7% and persons who finished the primary school or lower education 15.2%.

Persons in employment by status in employment is consist of:
- employees 79.4%,
- self-employed persons 18.0% and
- unpaid family workers 2.6%. 
The structure of persons in employment by sectors of activity shows that the highest share of them works in the service sector, 73.4%; then in industry and construction, 19.4% and 7.1% in agriculture, forestry and fishing.

In the observed period there were 9.1 thousands or 21.0% of unemployed persons who searched for work for less than 12 months; 7.0 thousands or 16.1% of unemployed persons searched for work up to 2 years, while 27.3 thousands or 62.9% of unemployed persons searched for work 2 years and over.
METHODOLOGICAL EXPLANATIONS

The Labour Force Survey is carried out in compliance with standards and recommendations of the International Labour Organisation (ILO) guidelines for labour force statistics, as well as in compliance with European legislative acts of the Council and Parliament, and with EUROSTAT’s requirements in relation to a methodology, survey organisation, sample procedure, design of questionnaires and definition of employment and unemployment.

Labour Force Survey provides the data on population aged 15 years and over by activity in the reference quarter, not by formal status of interviewed persons.

Working age population comprises all persons aged 15 years and over.

The term employed in the survey refer to persons who:

- performed any work for wage or profit (in cash, goods or services) during the reference week, even for one hour. Persons who receive wages for on-the-job training (apprentices or trainees) are also considered as employed.
- did not work (due to illness, annual leave or state holidays, education or training, maternity/paternity leave, reduced production and other temporary inability to work) but had a job or business from which he/she was absent during the reference week is considered as employed.

Self-employed persons with a business or farm are also considered to be working if one of the following applies:

- A person works in his own business or farm for the purpose of earning a profit, even if the enterprise is failing to make a profit;
- A person spends time on the operation of a business or farm even if no sales were made, no professional services were rendered, or nothing was actually produced (for example, a farmer who engages in farm maintenance activities; an architect who spends time waiting for clients in his/her office; a fisherman who repairs his boat or nets for future operations; a person who attends a convention or seminar);
- A person is in process of setting up a business or farm, such as the buying or installing of equipment, renting the office or ordering of supplies in preparation for opening a new business;
- A person who works on its own agriculture farm should be considered as employed if worked during the reference week. A person who works on its own small agriculture farm, and sell their products are also considered as employed.

A family worker is a person who assisted the other member of the household in running family business or agricultural holding, without receiving any formal pay and providing that they not considered themselves as employed.

The term unemployed refers to persons who:

- in the reference week did not work (not in paid employment or self-employment and did not do any paid work),
- in the past four weeks were actively seeking work (specific steps were taken to seek paid employment or self-employment),
- were currently available for work (within two weeks).

Persons who had found a job to start later are also included among unemployed persons.

Active population (labour force) include persons in employment (employed persons) and unemployed persons aged 15 years and over.

Inactive population are all persons aged 15 years and over, who are neither employed nor unemployed.

Activity rate represents the percentage of active population in the total population aged 15 years and over.

Employment rate represents the percentage of persons in employment in the total population aged 15 years and over.

Unemployment rate represents the percentage of unemployed persons in the total active population.

Inactivity rate represents the percentage of inactive population in total population aged 15 years and over.
