**METHODOLOGICAL NOTES**

**Statistics of marriages** aim to produce data that allow basic demographic analysis of the population at the level of Montenegro or municipalities. The survey collects data on marriage, as well as basic demographic, educational, and economic data on persons who get marriage.

**The divorce statistics** aims to produce data that allow basic demographic analysis of the population at the level of Montenegro or municipalities. The survey collects data on marriage, basic demographic, educational, and economic data on persons who are divorcing and the data on their children. Data are the basis for calculating the number of analytical demographic indicators used for the purpose of making the analysis of any current or future structure of the population.

**Sources of data**
Data on marriages are collected by municipality local offices. Data on divorces are collected in courts with jurisdiction over the divorce.

**Coverage and comparability**
Data on marriages and divorces are collected and processed in accordance with the definition of the total population, according to the international (UN, Eurostat). According to this definition, data on marriages and divorces are processed since 2005. In comparisons of data especially rates should take into account the changing definition of the total population.

According to the regulations on keeping registers cases of marriage should be entered in the register of the area in which they occurred, regardless of whether people live in this area or not. In the analysis of statistical point is done regrouping, so the results reported by residence, and divorces in the last place of common residence.

The statistics of marriages each unit of observation is lawful marriage, and the statistics of divorces every marriage is a final judgment of a competent court divorced.

**Definitions and explanations**

**Marriage** is regulated by the law units of husband and wife.

**Divorces** are the final judgment of a competent court terminated marriage.

**Marital status** is characteristic for which is taken into account only the legal marital status. This means the married / married persons who considered only the events in the observed occurrence was in a marriage concluded in accordance with legal provisions, and are considered in the divorced person whose marriage is legally dissolved.

**Age** is expressed in completed years of age. Calculated on the basis of date of birth of persons and the date when the case occurred. In most tables age was reported in the five-year age groups.

**The rate of divorce** is the number of divorces per 1,000 marriages.

**Legal base**
Data on related statistics are collected in accordance with the Law on Official Statistics and the system of official statistics ("Off. Gazette of Montenegro", no.18/12 of 30.03.2012.
