¹ The data presented are only for selected towns with existing dwellings in new residential buildings

² The data under this item refer to Bijelo Polje, Herceg Novi, Mojkovac, Plužine, Rožaje and Ulcinj

METHODOLOGICAL EXPLANATIONS

Data source, coverage and definitions

The data presented are collected under quarterly report on prices of dwellings in new residential buildings GRADJ-41 covering sold dwellings in new residential buildings, i.e. dwellings on the basis of sale contract. For the purpose of appropriate access to the data use, there should be noted that the prices published (prices per 1 m²) are average prices, thus they are the result of different characteristics of construction and differences in a month when the sale contract was concluded at one territory (of town and Montenegro).

All prices represent nominal expression of value from sale contract (without revalorization), and they are expressed per 1m² of useful (housing) area.

The total price of dwelling covers price of constructing arranging the construction land, price of construction works and other costs.

The price of arranging construction land includes the following elements: land acquisition, demolition, preparation detailed urban plans and projects, the field testing, repair works, arrangement of terrain around the building, communal equipping of land.

Price of construction works includes all construction works and profits of investors per 1 m² of floor space, craft-finishing and installation works on buildings and dwellings.

Other costs include all construction costs such as contributions and taxes for connections to the electricity grid and other communal facilities, taxes for obtaining building permits, VAT, the cost of projecting the building, the interest on the loans and advances and etc.
