Prices of dwellings in a new residential buildings
II quarter of 2019 (p)

The average price of dwellings in a new residential building in Montenegro in II quarter of 2019 was 1 206 EUR increase by 11.6% compared with the II quarter of 2018, while it is 17.8% increase compared with the I quarter of 2019.

The average price of dwellings in a new residential building in Podgorica in II quarter of 2019 was 1 204 EUR, in coastal region was 1 368 EUR, in central region 677 EUR, while the average price of dwellings in a new residential building in northern region was 880 EUR.

The differences over the years in average prices of dwellings in a new residential buildings significantly depend on the involvement of solidarity housing development dwellings. If the share of these dwellings increased, the average price of dwellings in a new residential buildings will be significantly lower, or if this share decreased, the average price will be higher.

In the release is shown the average price per the square meter of dwelling in a new residential building according to the following categories: enterprises (average market price) and solidarity housing development. The average market price of dwellings in a new residential building in Montenegro in category enterprises in II quarter of 2019 was 1 206 EUR, while in category solidarity housing there was no sale of dwellings.

* Fom the 1 st September in 2018, the municipality Tuzi in Podgorica has become an independent municipality and belongs to the Central Region.

- no occurrence

METHODOLOGICAL EXPLANATIONS

Data source, coverage and definitions

The data presented are collected under quarterly report on prices of dwellings in a new residential buildings GRADJ-41 covering sold dwellings in a new residential buildings, i.e. dwellings on the basis of sale contract. For the purpose of appropriate access to the data use, there should be noted that the prices published (prices per 1 m²) are average prices, thus they are the result of different characteristics of construction and differences in a month when the sale contract was concluded at one territory (of region and Montenegro).

All prices represent nominal expression of value from sale contract (without revalorization), and they are expressed per 1m² of useful (housing) area.

The average price of dwellings in a new residential building includes dwellings sold by enterprises, as well as dwellings sold by solidarity housing development institution. The average market price of dwellings in a new residential building includes dwellings sold by enterprises, but not including dwellings sold by solidarity housing development institution.

The total price of dwelling covers price of constructing arranging the construction land, price of construction works and other costs.

The price of arranging construction land includes the following elements: land acquisition, demolition, preparation detailed urban plans and projects, the field testing, repair works, arrangement of terrain around the building, communal equipping of land.

Price of construction works includes all construction works and profits of investors per 1 m² of floor space, craft-finishing and installation works on buildings and dwellings.

Other costs include all construction costs such as contributions and taxes for connections to the electricity grid and other communal facilities, taxes for obtaining building permits, VAT, the cost of projecting the building, the interest on the loans and advances and etc.

The last published data are considered preliminary, and becomes final within the defined deadline, as foreseen by the Statistical Release Calendar.
