<sup>1</sup> Table is taken from the official website of Eurostat and shows indices of construction activities of the current quarter compared to the base year 2010

Note: Data are not seasonally adjusted and because of that they are not comparable with EU data.

## METHODOLOGICAL EXPLANATIONS

### Data source and coverage

The presented data are collected by three-month report on construction GRADJ-31. The survey is based on the sample and covers enterprises with 5 employees and over in the area of construction, as well as units engaged in the construction activity, within the non-construction enterprises. The data are collected on enterprises from Montenegro, as well as on business units of foreign enterprises engaged in the construction activity in Montenegro.

### Definitions

*Value of finalised construction works* is expressed in current prices and it comprises all construction material built and work spent. The data on value of finalised construction works are presented on the basis of temporary situation provided by constructors. The value does not include expenses of buying the land, engineering, monitoring and VAT. The data on value of finalised work refer to works performed in the reporting period on finished and unfinished construction sites.

*Effective hours worked* include hours actually worked by workers engaged at the construction sites during regular working hours, as well as overtime work.
