METHODOLOGICAL EXPLANATIONS

Source of data and coverage

The annual survey IND-21 Industrial Production (PRODCOM) is in line with Regulation 3294/91 and the concepts and definitions prescribed by the regulations apply. The survey collects the following data: quantities of stocks at the beginning of the year, quantities produced (within this, data on quantities produced and especially about service-produced quantities are presented), quantity spent for further production, quantity of stocks at the end of the year, quantity and value of sales product.

The Statistical Business Register is used as a framework for coverage in this survey. Reporting units for the calculation of industrial production are industrial enterprises engaged in industrial production (part of Sector B and Sector C Classification of Activities), as well as parts of companies that are classified in other sectors Classification of Activities, and meet the criteria envisaged for this research.

From 2011, this survey was conducted according to current PRODCOM list, used as official nomenclature of industrial products.

The last published data are considered preliminary and becomes final within the defined deadline, as foreseen by the Statistical Release Calendar.
