

INDUSTRIJA

Izvori i metode prikupljanje podataka

Podaci statistike industrije obezbjeđuju se iz knjigovodstvene, kadrovske i druge evidencije i dokumentacije izvještajnih jedinica. Statistika ih prikuplja mjesečnim i godišnjim istraživanjima. Mjesečnim izvještajem industrije prikupljaju se prirodni podaci o proizvodnji, prometu kao i podaci o broju zaposlenih. Na osnovu tih podataka obračunavaju se indeksi proizvodnje i prometa u industriji. Podaci za bilans proizvodnje i potrošnje elektroenergije prikupljaju se u okviru posebnih istraživanja koja sprovodi MONSTAT.

Podaci o korišćenju kapaciteta industrije prikupljaju se od preduzeća godišnjim izvještajem industrije (na bazi nomenklature proizvoda) i izvještajem o korišćenju kapaciteta industrije svake pete godine (na bazi nomenklature osnovnih oruđa za rad).

Obuhvat

Do 2001. godine prema Jedinstvenoj Klasifikaciji djelatnosti pod industrijom se podrazumijeva industrija u užem smislu, koja obuhvata proizvodnju elektroenergije, rudarstvo i fabričku preradu rudarskih, šumskih i poljoprivrednih sirovina.

U Klasifikaciji djelatnosti ("Sl.list CG" br.18/11) koja se primjenjuje od 8. aprila 2011. godine, djelatnost industrije čine sektori:

Vađenje ruda i kamena, prerađivačka industrija, snabdijevanje električnom energijom, gasom, parom i klimatizacija.

Izvještajima o industrijskim preduzećima obuhvaćena su preduzeća, bez obzira na vrstu svojine, kao i djelovi neindustrijskih preduzeća koji obavljaju industrijsku djelatnost i veliki broj malih privatnih preduzeća, kao i namjenska proizvodnja.

Definicije

Industrija je djelatnost u kojoj se obavlja proizvodnja različitih proizvoda i prerada sirovina mineralnog, biljnog, životinjskog ili vještačkog porijekla. Osnovne karakteristike industrije su proizvodnja velikih količina proizvoda, ujednačenog kvaliteta, uz pretežnu upotrebu mašinskih sredstava za rad.

Industrijsko preduzeće je subjekat čija je pretežna djelatnost Industrijska proizvodnja.

Industrijski proizvodi su definisani kao ukupna gotova proizvodnja proizvoda navedenih u namenklaturi proizvoda koja je trajan osnov za prikazivanje industrijske proizvodnje. Indeksi za industriju ukupno daju se po Klasifikaciji djelatnosti NACE Rev.2. *Indeksi fizičkog obima industrijske proizvodnje* izražava promjene u obimu cjelokupne industrijske proizvodnje.

Obračun se zasniva na mjesečnim i godišnjim podacima o gotovoj proizvodnji, koji se iskazuju u naturalnom obliku prema PRODCOM Nomenklaturi proizvoda za mjesečni izvještaj i mjerilima ponderacionog sistema.

Zaključno sa 1969. godinom ponderacioni koeficijenti su formirani na osnovu ličnih primanja i amortizacije, a od 1970. godine na osnovu društvenog proizvoda.

Za obračun indeksa industrijske proizvodnje od 1993. do 1997. godine primjenjivani su ponderacioni koeficijenti obračunati na osnovu podataka o industrijskoj proizvodnji Crne Gore u 1990. godine. Od 1997. godine koriste se ponderacioni koeficijenti obračunati na osnovu podataka za 1995. godinu.

Zbog razlike u ponderima indeksa fizičkog obima industrijske proizvodnje do 1991. ne pokazuje istu dinamiku kao obračuni društvenog proizvoda i narodnog dohodka u stalnim cijenama.

Za obračun indeksa industrijske proizvodnje od 2011. godine primjenjuju se ponderacioni koeficijenti obračunati na osnovu podataka o bruto dodatoj vrijednosti Crne Gore u 2009. godini.

INDUSTRY

Sources and methods of data collection

Data of industry statistics are obtained from bookkeeping records, human resources evidence and other documentation of reporting units. These data are collected through surveys on a monthly and annual basis. Data on production, turnover as well as data on employees are collected on a monthly basis. These data are used for the indices of production and industrial turnover. Data on production and consumption of electric power are collected through other surveys carried out by MONSTAT.

Data on exploitation of industrial capacities are collected through annual industrial survey (on the basis of nomenclature of products) and survey on use of industrial capacities conducted every five years (based on nomenclature of primary work tools).

Coverage

Up to 2001, according to the Unique Classification of Economic Activities, industry referred to industry in a narrower sense comprising electric power generation and consumption, mining and processing of mining, forest and agricultural raw materials.

Since April 8th 2011, the Classification of Activities has been introduced, (Official Gazette of Montenegro no. 18/11). According to the classification, the industry comprises activities of the following sectors:

Mining and quarrying, Manufacturing, Electricity, gas, steam and air conditioning supply.

Surveys on industrial enterprises cover all enterprises, not depending of ownership, as well as parts of non-industrial enterprises involved in industrial activities, great number of small private enterprises and restricted/specific production.

Definitions

Industry refers to production of various products as well as processing of raw materials of mineral, floral, animal or artificial origin. The main characteristics of industry are production of huge products quantities with standardized quality, mainly using machinery tools.

Industrial enterprise is an entity engaged in industrial production as the principal activity.

Industrial products are defined as total final production of those products that are listed in the Nomenclature of industrial products that is a standard reference for presentation of industrial production. Industrial indices are calculated according to the NACE Rev2. *Index of physical volume of industrial production* represents changes in volume of total industrial production.

Calculation is based on data from monthly and annual surveys / reports on final products, shown in physical terms according to PRODCOM NIP for monthly report and criteria of weighting system.

Until 1969, weighting coefficients were calculated on the basis of personal incomes and amortization, and since 1970 on the basis of domestic product.

In the period from 1993 until 1997, Index of industrial production was based on the new weighting coefficients calculated from the data on industrial production of Montenegro in 1990. As of 1997, the weighting coefficients calculated from 1995 data have been used.

Due to difference in weights, the index of physical volume of industrial production until 1991 did not show the same dynamics as compilations of domestic product and national income in constant prices. In the period from 2011 Index of industrial production was based on the new weighting coefficients calculated from the data on gross value added in Montenegro in 2009.
