METHODOLOGICAL NOTES

3

Source of data

The data on maritime transport are the result of regular annual surveys on reporting units with the sea transport of goods and passengers carried by sea, the main activity.

Coverage

The surveys cover enterprises classified within the Classification Unit Register by Activity Classification in Section H (Transport and storage). Area 50.

Definitions

Traffic volume is the sum of the quantities of goods from the inner-unloading operations, exports and imports.

Transport of passengers carried by the number of passengers carried and passenger miles, while one passenger miles carried transport one person over a distance of one nautical miles.

Passenger ships are vessels with its own propulsion devices that can simultaneously carry more than 12 passengers.

Cargo ships are vessels intended for freight.
