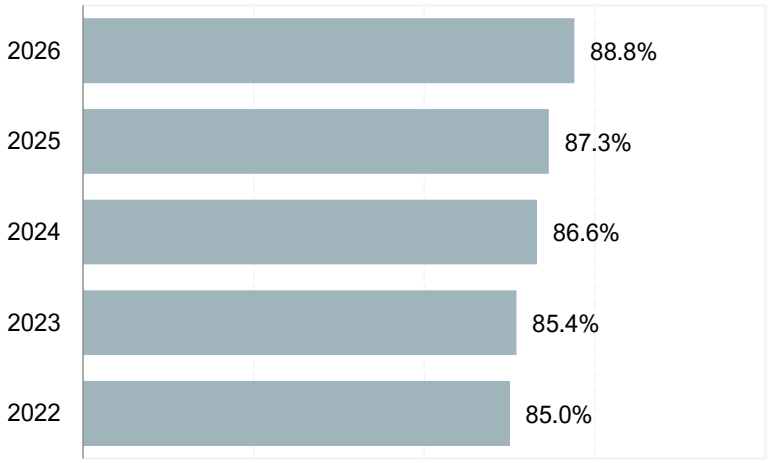
ICT usage in enterprises

2026

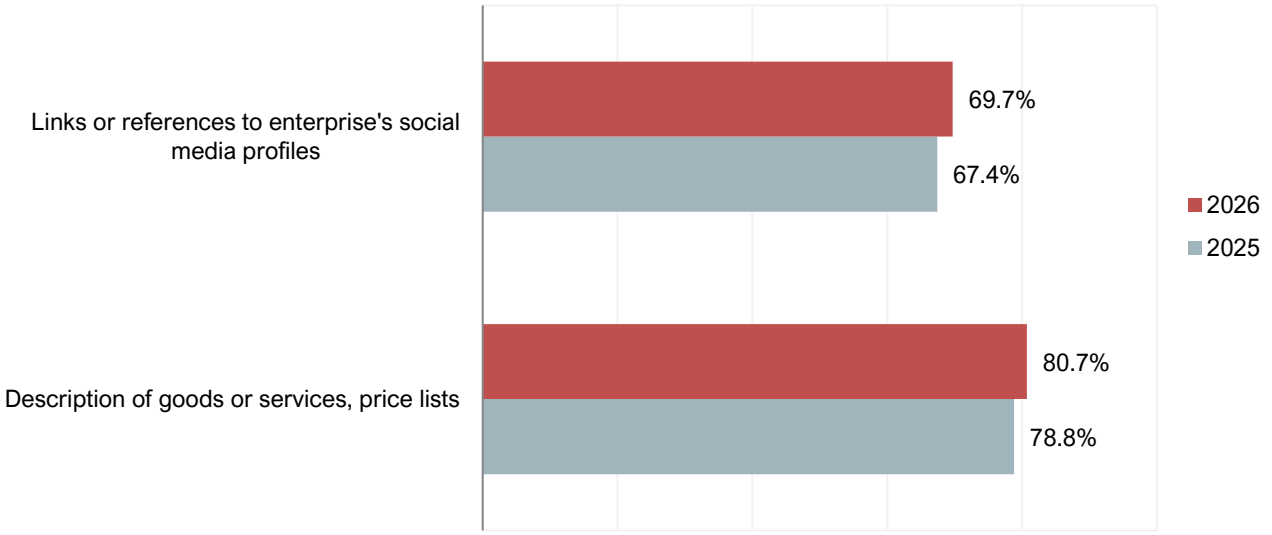
In Montenegro, 100.0% of surveyed enterprises reported on the use of internet in their activities. All data in this release refer to enterprises which use the internet in 2026.

Percentage of enterprises with a website is 88.8% in 2026. In the five-year period, an increase in number of enterprises having a website is recorded. In 2026, the percentage of enteprises that have a website increased by 3.8 percentage points (from 85.0% to 88.8%), compared to 2022.

Graph 1. Enterprises having a website

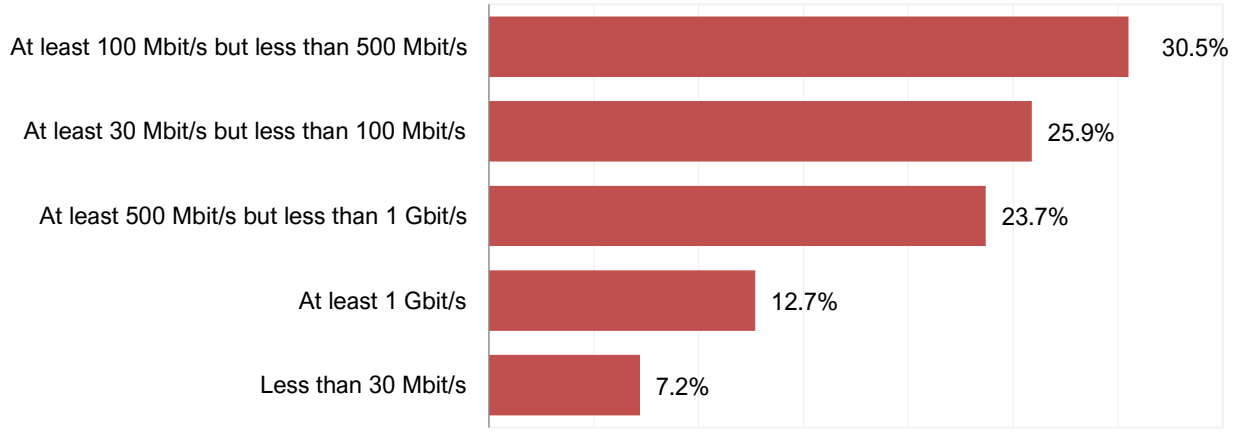


Graph 2. Services provided by enterprises using website



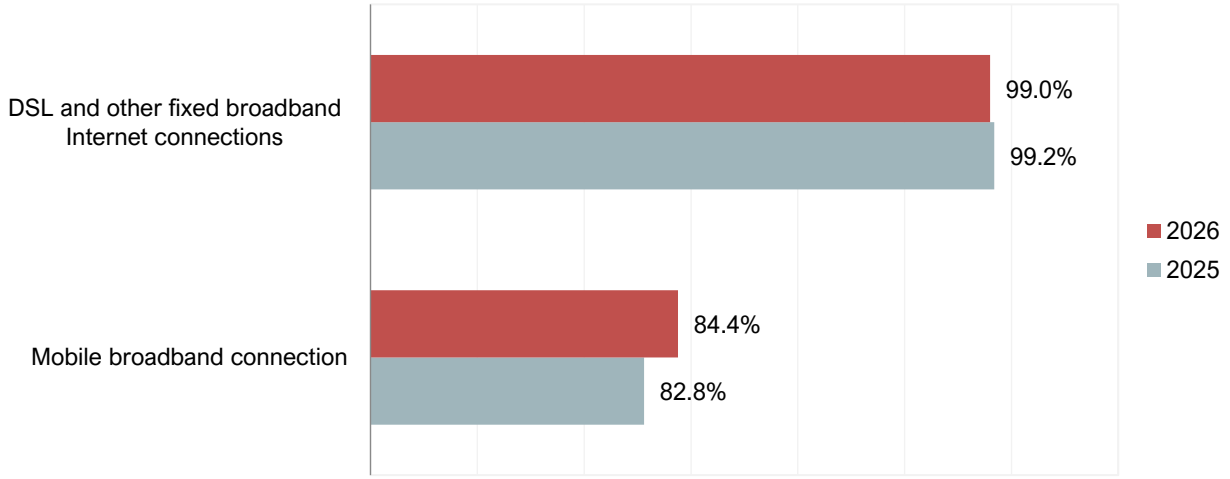
Out of the enterprises with a website, 80.7% offer access to description of goods or services and price lists, while 69.7% of enterprises have links or references in social media profiles.

Graph 3. Maximum internet connection speed in enterprises



The survey results show that: 30.5% of enterprises connect to the internet with a maximum speed of at least 100 Mbit/s, but less than 500 Mbit/s; 25.9% of enterprises use the internet with connection speed of at least 30 Mbit/s, but less than 100 Mbit/s; while 23.7% of enterprises reported internet connection speed at least 500 Mbit/s, but less than 1 Gbit/s.

Graph 4. External connection of the internet in enterprises



Out of enterprises with the internet access, 99.0% reported the DSL use or some other type of fixed broadband connection to the internet. Mobile broadband connection is used among 84.4% of enterprises, which is an increase of 1.6 percentage points, compared to the previous year.

METHODOLOGICAL NOTES

Statistical Office of Montenegro conducts the survey on the use of information and communication technologies – ICT in Montenegro. This survey refers to the ICT usage in enterprises.

Basic information about the survey:

The aim of the survey is to collect the data on presence and usage of ICT by enterprises in sectors by NACE Rev 2 classification: administrative and support service activities; construction; information and communication; real estate activities; manufacturing, electricity, gas, steam and air conditioning; water supply, sewerage, waste management, and remediation activities; professional, scientific, and technical activities; transport and storage; wholesale and retail trade; repair of motor vehicles and motorcycles; accommodation and food service activities.

Telephone interview - CATI data collection method.

The frame for the sample was formed on the basis of data from the Business Register of Statistical Office, which includes all enteprises from certain sectors according to the NACE Rev 2 classification, with 10 or more employees.

The reference period for majority of questions is 2026 while some questions referred to the entire 2025.

When using the data, state:

"Data source: Statistical Office - MONSTAT"
