## METHODOLOGICAL NOTES

Survey on total tourist arrivals and overnight stays combines tourism traffic (arrivals and overnight stays) in the collective and in the individual / private accommodation.

Data on tourist traffic in collective accommodation (number of arrivals and overnight stays) have been collected by regular Monthly report on tourists arrivals and overnight stays in the collective accommodation establishments (form TU-11). Reports are made according to guest books which are led by receptions of collective accommodation establishments (all types of hotels, vacation facilities, boarding houses, motels, tourist resorts, hostels, etc.).

Since 2017 the methodology for calculating individual accommodation, in the process of data collection and processing, has included the following data sources: administrative databases (Local Tourism Organizations, Ministry of the Interior, Ministry of Sustainable Development and Tourism, National Tourism Organization, Secretariats of Local Self-Government) and statistical sources and records. The newly established administrative data sources are the result of new legislation, such as the register of residence registration (ie. Database RB90) under the jurisdiction of the Ministry of the Interior (regulated by the Law on Foreigners).

Non-registered tourists are not subject of this survey.

The aim of the survey on total arrivals and overnight stays is to provide basic information about the scope of traffic (arrivals and overnight stays) of domestic and foreign tourists.

The survey collects data on:

- number of arrivals and overnight stays of domestic and foreign tourists in all accommodation establishments in Montenegro;
- structure of arrivals and overnight stays of foreign tourists by country of residence in all accommodation establishments in Montenegro.

The survey covers all official data of catering establishments in the territory of Montenegro which provides accommodation services in houses and rooms for rent, as well as tourist apartments.
