

Price indices of industrial products imported in Montenegro

IV Quarter 2021^(p)

Prices of industrial products from import in Montenegro in IV quarter of 2021 compared with IV quarter of 2020 increased for 13.0%. Observing the sectors of Classification of activities 2010, compared with IV quarter of 2020, sector *Mining and quarrying* increased for 25.6%, while sector *Manufacturing* increased for 13.0%, compared with IV quarter of 2020.

Prices of industrial products from import in Montenegro in IV quarter of 2021 compared with III quarter of the same year increased for 2.8%. Observing the sectors of Classification of activities 2010, compared with III quarter of 2021, sector *Mining and quarrying* increased for 11.2%, while sector *Manufacturing* increased for 2.8%, compared with III quarter of 2021.

Graph 1. Growth rate of import prices, in %

- ❖ **Annual growth rate** – change in prices in a current quarter compared with the same quarter of the previous year, in %.
- ❖ **Quarterly growth rate** – change in prices in a current quarter compared with the previous quarter, in %.

BY PURPOSE OF CONSUMPTION	<u>IV Q 2021</u> <u>Ø 2020</u>	<u>IV Q 2021</u> <u>III Q 2021</u>	<u>IV Q 2021</u> <u>IV Q 2020</u>	<u>I-IV Q 2021</u> <u>I-IV Q 2020</u>
Energy	143.1	110.9	140.1	126.4
Intermediate goods, except energy	112.5	101.3	113.4	108.6
Capital goods	102.1	101.4	102.6	100.4
Durable consumer goods	115.6	100.0	115.6	110.4
Non-durable consumer goods	104.0	100.3	104.3	103.9

METHODOLOGICAL NOTES

The purpose of statistics on import price indices is to collect the data on monthly price changes of industrial products from the import. Purchase price of industrial products from import is the price of a good delivered at the frontier of the importing country, including transportation costs, insurance charges, and any other costs incurred to that point (CIF price) that influence on the unit price of a product.

Price indices of industrial products from the import represent important economic indicators which can be used as an inflation measure, as time series deflators, especially for needs of national accounts and as an instrument for harmonizing prices when different purchase and sale contracts are concluded.

This survey includes companies - importers of industrial products covered by sectors B and C of [Classification of activities 2010](#), which substantially and structurally fully corresponds to NACE Rev. 2. The sample is determined by three criteria: selection of products with significant import values; selection of enterprises importing these selected products, selection of representative items in cooperation with the reporting units.

Data are published according [Statistical Release Calendar](#).

The last published data are considered **preliminary**, and becomes final within the defined deadline, as foreseen by the Statistical Release Calendar.

Special aggregates:

Energy – Includes activities of extraction, production, processing and distribution of energy.

Intermediate goods – Include products that are final product of manufacturing process, but can also be used as an input to other production processes.

Capital goods – Include heavy equipment which require relatively large investments, and are purchased for use over a long period of time.

Durable consumer goods – Include products for the mass market and are intended to last for several years.

Non-durable consumer goods – Include products for mass consumption, purchased by consumers for daily or frequent use.
