## METHODOLOGICAL NOTES

The presented data covered the number of building permits, as well as the number and floor area of dwellings in the building for whose the building permits and notification of building work are issued. The data source is the Ministry of Spatial Planning, Urbanism, and State Property.

The investor is a person for whose needs a construction is built, i.e. a person who finance the construction and on whose name the building permit is issued. An investor may be a legal or natural person.

A building is a structure that has a roof and external walls, whether they are independent or shared walls in cases where one building leans to the other, with one or more entrances, and it was built like an independent usable unit and purposes of the for housing.

Dwelling is any connected unity in construction permits, intended for dwelling, consisting of one or more rooms with appropriate additional premises (kitchen, bathroom, lobby, pantry, toilet, and similar), or without additional rooms, and it can have one or more separate entrances.

Floor area is useful floor area measured inside the dwelling walls.

Data are published according to the [Statistical Release Calendar](#).

The last published data are considered preliminary, and become final within the defined deadline, as foreseen by the Statistical Release Calendar.
