Building permits

First quarter 2026

According to data from the Ministry of Spatial Planning, Urbanism, and State Property and local self-government units, in the first quarter of 2026, 213 building permits were issued in Montenegro. Of the total number of building permits issued and notifications of building work, 128 building permits refer to natural persons, while 85 were issued for legal persons. According to issued building permits, in the first quarter of 2026, the number of dwellings provided for construction was 1,388, with a floor area of 83,289 m².

Table 2. Dwellings in buildings for which building permits were issued, by types of construction, I quarter 2026

Residential buildings	Number of dwellings	Floor area in m ²
Total	1 388	83 289
With one dwelling	78	11 154
With two dwellings	14	1 558
With three and more dwellings	1 289	70 009
Addition (extension)	7	568

METHODOLOGICAL NOTES

The presented data covered the number of building permits and the number and floor area of dwellings for which the permits were issued.

In accordance with the Law on Building Construction ("Official Gazette of Montenegro", No. 19/2025, dated March 4, 2025), the data sources for this survey are the Ministry of Spatial Planning, Urban Planning and State Property and the secretariats responsible for urban planning in local self-government units.

The investor is a person for whose needs a construction is built, i.e., a person who finances the construction and on whose name the building permit is issued. An investor may be a legal or natural person.

A building is a structure that has a roof and external walls, whether they are independent or shared walls in cases where one building leans to the other, with one or more entrances, and it was built like an independent usable unit, and the purpose is for housing.

Dwelling is any connected unit in construction permits, intended for dwelling, consisting of one or more rooms with appropriate additional premises (kitchen, bathroom, lobby, pantry, toilet, and similar), or without additional rooms, and it can have one or more separate entrances.

Floor area is the useful floor area measured inside the dwelling walls.

Data are published according to the [Statistical Release Calendar](#).

According to the Revision policy of the Statistical Office, the final data shall be published with the date defined by the Statistical Release Calendar.

When using the data, state:

"Data source: Statistical Office - MONSTAT"
