

Consumption of construction and propulsion materials 2019. godina^(p)

The annual release on the consumption of construction and propulsion materials covers material and energy resources used by contractors (construction and non-construction enterprises) for construction of objects, maintenance, repair and operation of machinery and motor pool, heating, as well as for stationery and other supplies.

The value of building material spent in 2019 in Montenegro is EUR 177.9 mil EUR representing the increase of 11.6% compared with 2018.

Graph 1. Total value of construction and propulsion material spent, in thous. EUR

(p) - Preliminary data

Table 1. Quantity and value of spent construction materials, Montenegro

Type of material	Unit of measurement	2018		2019	
		Quantity of spent construction materials	Value of spent construction materials, u thous. EUR	Quantity of spent construction materials	Value of spent construction materials, u thous. EUR
Building elements					
Solid brick	thous.pcs	1 823	357	1 314	274
Perforated brick	thous.pcs	1 110	336	1 499	345
Solid facade brick	thous.pcs	43	33	426	116
Hollow clay blocks	thous.pcs	2 228	1 088	1 543	510
Facade blocks	thous.pcs	791	330	317	173
Brick and blocks, based on cement, slag and dross	thous.pcs	2 603	1 252	1 618	977
Brick and blocks made from other materials (kermesite, "siporex")	thous.pcs	292	77	380	186
Elements for ceilings and arches					
Floor bricks and inserting bricks	thous.pcs	135	95	557	389
Beams, half-assembly and assembly for arches (clay elements)	thous.m	61	46	43	43
Blocks for ceilings and arches (on the basis of cement)	thous.pcs	4	3	73	60
Prefabricated elements and finished constructions					
Light building boards for outside walls	m ²	1 793	11	1257	9
Boards for walls facing	m ²	1 731	78	1105	60
Light building boards for partition walls	m ²	20 460	451	13 795	188
Light building boards for ceilings	m ²	9 501	153	8 335	132
Light building isolation boards	m ²	13 800	262	13 010	281
Plaster boards, all types	m ²	161 715	960	157 548	1 156
Steel constructions for bridges	t	49	92	48	91
Other steel constructions, all types (roofs, pillars, frames, scaffoldings and similar)	t	3 538	1 043	4 921	1 880
Building constructions and prefabricated elements for civil engineering	t	10 700	549	8 041	400
High buildings prefabricated constructions elements	t	30	9	11 013	758
Wooden construction (finished roof constructions)	m ³	118	24	568	70
Binder material					
Quicklime	t	624	126	458	118
Lime, hydrated	t	1 433	236	1 885	286
Plaster, baked	t	976	102	928	97
Portland cement	t	23 222	2 767	20 519	2 061
Cement, other types	t	18 464	1 779	23 137	1 993
Plastic building materials	t	1 020	510	794	417
Cement mortars, all types	m ³	11 676	703	22 746	1 326
Concrete, fresh	m ³	511 483	33 819	528 692	35 190
Asphalt	t	149 156	15 443	210 356	20 772
Aggregates and profiled material of stone					
Profiled material of stone (curb stone, fence, stone cube, etc.)	m ³	1 422	497	3 449	717
Crashed technical stone and marble, all types	m ³	1 626	152	5 572	412
Broken stone and small size stone	m ³	31 117	500	34 099	610
Aggregates for concrete	m ³	515 250	6 438	534 905	6 742
Gravel	m ³	56 906	1 263	59 160	1 396
Sand	m ³	39 278	613	26 205	338
Terrazzo-granulates	t	453	24	960	36

METHODOLOGICAL EXPLANATIONS

The presented data are collected through survey on consumption of construction and propulsion materials (GRADJ-13). The survey is realised on a sample basis. The frame for a sample is enterprises with 5 and more employees who are in a Statistical Business register according to the Classification of activities classified in sector F – Construction, as well as companies (KAU) whose business units engaged in construction works. Survey covers all large and medium enterprises (class 2 and 3), while small enterprises (class 1) is selected by random simple sample.

The consumption of construction and propulsion materials is presented for the total construction enterprise submitting the report, including also the consumption of electricity and material for heating for joint services. Non-construction enterprises report the consumption of building material only for business units, as well as the consumption of fuel and other material for their needs.

The type of material is presented based on the records kept by material accounting, regardless if the reporting unit purchased or produced the material by itself.

Data are published according [Statistical Release Calendar](#).

The last published data are considered preliminary, and becomes final within the defined deadline, as foreseen by the Statistical Release Calendar.
