1. Introduction – Basic information about the survey

1.1 Purpose, goal and subject of the survey

Death statistics aim to produce data on the demographic and socio-economic characteristics of deaths. Based on these data, it is possible to monitor and study the total mortality of the population. The obtained data are needed for the analysis of the natural movement of the population at the level of Montenegro and municipalities. The data are also the basis for calculating a number of analytical demographic indicators that are used for the purpose of making analyzes of either the current or future structure of the population. Death statistics cover all deaths entered in the Register of Deaths. In the processing, the data are grouped according to the residence of the deceased. Thus, the results of demographic statistics were processed according to the principle of place of permanent residence, which corresponds to the concept of permanent population applied in the census. Data are published at the municipal level and at the level of Montenegro.

1.2 Legal basis

The Law on Official Statistics and Official Statistical System ([Official Gazette of Montenegro No 18/12 and 47/19) defines provisions for collection, processing, and dissemination of data. The Law provides to the Statistical Office clear and wide legal powers to collect and access the data necessary for the implementation of Programme and Annual Plan. The Law gives a priority to the use of administrative data and right of access to individual data that are a result of survey of other official statistical producers. As an annex to legal provisions, Statistical Office signed a Memorandum of Cooperation in the area of statistics on birth and death with the Ministry of the Interior, as the administrative source of data, in 2010.

1.3 Statistical units

Dead person.

1.4 Coverage and scope of survey

1.4.1 Sectors

Not relevant.

1.4.2 Statistical population

All dead persons recoded in Register of deaths - Ministry of Interior.

1.5 Referent geographical area

Montenegro and municipalities

1.6 Concepts and definitions

Dead person is a person who died any time after the birth. A dead infant is every child that after was live-born died before reaching one year of age.

1.7 Classifications

Municipalities.

1.8 Frequency of data collection

Monthly (annual service)

1.9 Frequency of data dissemination

- monthly, preliminary data
- annual, final data
- Annual data is submitted to Eurostat

1.10 Methodology

Methodology about death statistics is available on link:

http://monstat.org/userfiles/file/demografija/umrli/Met_%20deaths%20en.pdf

1.11 Base period

Not relevant.

1.12 Unit of measure

Number of death persons.

1.13 Source of data

Administrative data source - death register. Law on the Register of Births and Deaths ("Official Gazette of Montenegro", no. 47/08 from 07.08.2008, 41/10 from 23.07.2010).

2. Relevance – Data users

2.1 User needs

International users:

- Eurostat,
- UN organizations,

National users:

- Ministries and other public administration bodies,
- Local government, and other local government bodies.
- Non-governmental organizations,
- Students,
- Researchers,
- Media.

2.2 User satisfaction

In order to measure the extent to which it meets its obligations to users and as part of a new quality policy, the Statistical Office conducted a second survey on customer satisfaction. The first survey on customer satisfaction was conducted through a web survey, in the period from September 1 to October 20, 2017, while the second survey was conducted in the period from March 6 to April 27, 2020. The survey provides information on the needs of users for the results of official statistics and their satisfaction with the data and services produced by the official statistical system of Montenegro. The results of the survey are available on the website of the Statistical Office, link: <http://monstat.org/cg/page.php?id=1625&pageid=1625>

3. Accuracy and reliability

3.1 Accuracy – Overall remark

Since the data source is administrative, all registered cases of death are covered, which provides a high level of accuracy.

3.2 Sampling error

Not relevant.

Indicators of sampling error (A1)

Not relevant.

3.3 Non-sampling error

Not relevant.

3.3.1 Coverage error

Not relevant.

Indicators of coverage error (A2)

Not relevant.

3.3.2 Error of measurement

Not relevant.

Nonresponse rate (A4)

Not relevant.

3.4 Seasonal adjustment

Not relevant.

3.5 Data revision

3.5.1 Data revision policy

Statistical Office has adopted the revision policy and it is available on the website:

<https://www.monstat.org/userfiles/file/o%20nama/2017/Revision%20policy.pdf>

3.5.2 Data revision practice

Annual Plan forces preliminary and final announcement of data. According to this, a regular revision is applied for this survey. There is no significant and unplanned revision.

3.5.3 Data revision - average size (A6)

Not available.

4. Timeliness and punctuality

4.1 Timeliness

Final data are published not later than 100 days after the expiration of the reference period (T+100).
Statistical Release

Calendar is available on the following link : <http://monstat.org/eng/page.php?id=12&pageid=12>

For 2020 data are published on 8 April 2021. Data are submitted to Eurostat on 31 december current year for previous year.

Time lag of the first results

Preliminary data shall be published no later than 60 (T + 60) days after the expiration of the reference period.

Time lag of the final results

Final results are published no later than 100 days after the expiration of the reference period (T + 100). The final data are published in the releases.

4.2 Punctuality TP3

Data are published on the day defined by the Annual Plan and Statistical Releases Calendar. Indicator TP3 is 0, i.e.

there is no difference between planned and actual announcement.

5. Availability and clarity

5.1 Calendar of publishing statistical data

The Law on Official Statistics and the System of Official Statistics ("Official Gazette of Montenegro" No. 18/12 and No. 47/19) prescribes that producers of official statistics prepare, update and publish the Calendar of Publication of Statistical Data. Published on the website of the Statistical Office no later than December 20 for the following year, for all producers of official statistics that include the date of publication of statistical data. Any change in the date of publication in the Calendar shall be announced in advance in accordance with the Procedure for Unplanned Audits.

5.2 Access to Calendar of publishing statistical data

[https://www.monstat.org/uploads/files/O%20NAMA/Kalendar%20objavljivanja%20statisti%C4%8Dkih%20podataka%20za%202021.%20godinu%20%20ENG%20-%20za%20web%20sajt\(1\).pdf](https://www.monstat.org/uploads/files/O%20NAMA/Kalendar%20objavljivanja%20statisti%C4%8Dkih%20podataka%20za%202021.%20godinu%20%20ENG%20-%20za%20web%20sajt(1).pdf)

5.3 Releases

Releases are published once a year and are available on the website at the link:

<https://www.monstat.org/eng/page.php?id=1293&pageid=47>

5.4 Publication

Statistical Office publishes the following regular publications:

1. Monthly statistical review,
2. Statistical Yearbook,
3. Montenegro in figures,

All publication published by Statistical Office are available at the following link:

<http://monstat.org/eng/publikacije.php>

5.5 Online database

Data base is available o following linkin the section Data:

<https://www.monstat.org/eng/page.php?id=50&pageid=50>

5.6 Availability of microdata

The Law on Official Statistics and Official Statistical System (Official Gazette of Montenegro No 18/12 and 47/19) regulates rules under which external users can obtain an access to individual data for needs of research. Article 58 defines types of scientific and research organizations that can obtain such data. Providing individual data without identifier is possible only upon a written request of scientific and research institutions, with purpose of performing scientific and research activities as well as international statistical organizations and statistical producers from other countries. Research entity signs the agreement with Statistical Office, and it signs the statement on respecting the confidentiality principle. Official statistical producers keeps a separate records on users and purpose of using the statistical data given to these users.

5.7 Metadata completeness rate

Not available.

6. Comparability

6.1 Comparability - geographical

Data are collected in accordance with the EU Regulation No 1260/2013, thus a comparability is ensured with all countries who are using the same methodology.

6.2 Comparability - over time

A comparable time series of data is available since 1974.

Indicator for comparability over the time

Not available.
