## METHODOLOGICAL NOTES

Data on the production of forest assortments in state forests are collected through a regular monthly survey Production of forest assortments in state forests (SUM – 22). The questionnaire is filled out on the basis of the Forest Administration records.

The aim of the Survey on production of forest assortments in state forests is to provide data on production, sales and stock of forest assortments in state forests.

**Forest** is considered to be land overgrown with forest trees in the form of a stand with an area of more than 20 acres, as well as forest nurseries, seed stands and seed plantations that are an integral part of the forest, forest infrastructure, fire lines and other open areas within the forest area less than 20 acres.

Separate groups of forest trees on an area of less than 20 ares, forest nurseries and seed plantations that are not an integral part of the forest, protective belts of forest trees with an area of less than 20 ares and a width of less than 20 m, tree lines and parks in settlements are not considered forests.

**Industrial wood** has favorable physical and chemical characteristics and is intended for industrial (mechanical and chemical) processing.

**Technical wood** has favourable physical and chemical characteristics and is intended for various technical purposes.

**Firewood** is wood cut in order to be used for fire or charcoal production.
