Indices of physical volume of publicly owned forest assortments production

The second quarter 2023

Production of forest assortments from state forests in Montenegro in the second quarter of 2023, compared to the same quarter of previous year increased for **54.7%***.

The production of forest assortments from state forests in Montenegro in the second quarter of 2023 compared to the first quarter of 2023 recorded a significant increase.

	IIQ 2023 Ø 2022	IIQ 2023 IQ 2023	IIQ 2023 IIQ 2022	I-IIQ 2023 I-IIQ 2022
Total	136,6*	300,0 ¹	154,7*	153,7

¹Calculated index is higher than 300.0

* Corrected data

In the release "Indices of physical volume of publicly owned forest assortments production" for the second quarter of 2023 released on 24 August 2023, there was a technical oversight. Therefore, we are publishing corrected release, and ask you to use it.

METHODOLOGICAL NOTES

Data on the production of forest assortments in state forests are collected through a regular monthly survey Production of forest assortments in state forests (SUM – 22). The questionnaire is filled out on the basis of the Forest Administration records.

The aim of the Survey on production of forest assortments in state forests is to provide data on production, sales and stock of forest assortments in state forests.

Forest is considered to be land overgrown with forest trees in the form of a stand with an area of more than 20 acres, as well as forest nurseries, seed stands and seed plantations that are an integral part of the forest, forest infrastructure, fire lines and other open areas within the forest area less than 20 ares.

Separate groups of forest trees on an area of less than 20 acres, forest nurseries and seed plantations that are not an integral part of the forest, protective belts of forest trees with an area of less than 20 ares, and a width of less than 20 m, tree lines and parks in settlements are not considered forests.

Industrial wood has favourable physical and chemical characteristics and is intended for industrial (mechanical and chemical) processing.

Technical wood has favourable physical and chemical characteristics and is intended for various technical purposes.

Firewood is wood cut in order to be used for fire or charcoal production.

When using the data, state:

"Data source: Statistical Office of Montenegro - MONSTAT"
