METHODOLOGICAL NOTES

Internal trade statistics covers and presents turnover of companies with the retail trade as their main activity.

The survey is conducted on the basis of a sample and covers companies that are registered in Area 47 according to the Classification of Activities NACE Rev2. The sample include all large and medium enterprises, while small enterprises were determined by the method of random sampling.

Turnover of goods in retail trade represents the value of goods sold by the company that is sold to final consumers, ie the population for personal consumption and household use, as well as legal and natural persons to perform activities.

Data are published according [Statistical Release Calendar](#).

The last published data are considered **preliminary**, and becomes final within the defined deadline, as foreseen by the Statistical Release Calendar.
