METHODOLOGICAL NOTES

Internal trade statistics covers and presents turnover of companies with the retail trade as their main activity.

From January 2021, the research is based on an administrative data source (Revenue and Customs Administration of Montenegro). Pursuant to the cooperation agreement concluded in Podgorica in September 2010 between the Statistical Office and the Revenue and Customs Administration, turnover data are submitted on the basis of VAT returns in electronic form.

The survey covers companies that are registered in area 47 according to the Classification of Activities (KD 2010).

Turnover of goods in retail trade represents the value of goods sold by the company that is sold to final consumers, ie the population for personal consumption and household use, as well as legal and natural persons to perform activities.

Indices of turnover of goods in constant prices are received by deflating index in current prices by appropriate indices of retail goods prices.

Data are published according [Statistical Release Calendar](#).

The last published data are considered preliminary, and becomes final within the defined deadline, as foreseen by the Statistical Release Calendar.

When using the data, state:

"Data source: Statistical Office - MONSTAT"
