G47NF_OTH	Turnover indices of retail trade of other non-food products	112.3	87.9	106.5

## METHODOLOGICAL NOTES

Internal trade statistics covers and presents turnover of companies with the retail trade as their main activity.

The source of data for the implementation of the Turnover index in retail trade survey is turnover data from VAT returns (jurisdiction of the Tax Administration) on day 16 February 2026.

The survey covers companies that are registered in area 47 according to the Classification of Activities (KD 2010).

Turnover of goods in retail trade represents the value of goods sold by the company that is sold to final consumers, ie the population for personal consumption and household use, as well as legal and natural persons to perform activities.

Indices of turnover of goods in constant prices are received by deflating index in current prices by appropriate indices of retail goods prices.

Data are published according to the [Statistical Release Calendar](#).

The last published data are considered preliminary, and becomes final within the defined deadline, as foreseen by the Statistical Release Calendar.

When using the data, state:

"Data source: Statistical Office - MONSTAT"

*More data, as well as detailed methodological notes can be found in the section: [Retail trade](#)*
