Harmonised Index of Consumer Prices (HICP)
October 2011

Annual inflation rate in October was 3.9%

Monthly inflation measured by Harmonised Index of Consumer Prices in September increased 0.4%. The highest influence of monthly inflation was noticed because of the increase of price for vegetables and fuels and lubricants. Annual inflation in October amounted +3.9% and it is higher compared to September when it was +3.7%.

When observing the main groups, monthly growth of prices was noticed in the following groups: Health (+1.5%), Food and non-alcoholic beverages (+1.0%), Transport (+0.5%), Housing, water, electricity, gas and other fuels (+0.2%), Miscellaneous goods and services (+0.2%), Alcoholic beverages and tobacco (+0.1%), Clothing and footwear (+0.1%), Furnishing, household equipment and routine household maintenance (+0.1%), while a decrease was noticed in the group Recreation and culture (-0.1%). Prices in the groups: Communications, Education and *Hotels and restaurants remain at the same level as in the previous month.*

Positive annual inflation rates in September were observed in the following groups: Alcoholic beverages and tobacco (+15.2%); Health (+13.6%); Transport (+7.5%); Food and non-alcoholic beverages (+5.0%); Communications (+3.0%); Housing, water, electricity, gas and other fuels (+1.7%), Miscellaneous goods and services (+1.7%), Hotels and restaurants (+1.1%); Clothing and footwear (+1.0%) and *Recreation and culture (+0.2%), while negative annual inflation rates were observed in the following groups: Education (-0.5%)* and *Furnishing, household equipment and routine household maintenance (-0.1%).*

Harmonised index of consumer prices (HICP), 2010=100

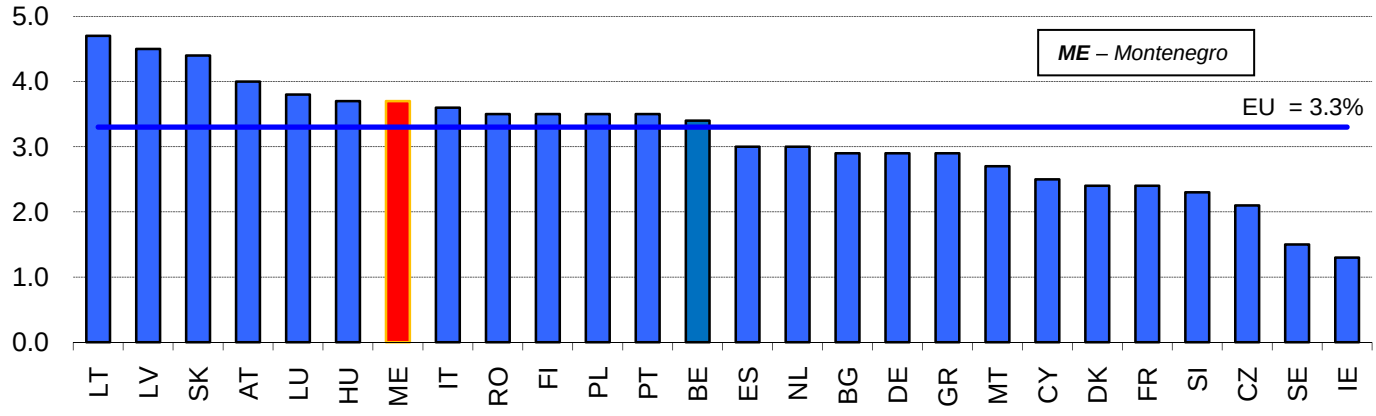
Diagram 2: Annual inflation rate measured by HICP, September 2011



Montenegro annual inflation was 3.7% in September 2011. EU annual inflation was 3.3% in September 2011, while there was 3.0% in the Euro area.

Harmonised Index of Consumer Prices (HICP) is the basis for comparative measurement of inflation in the European Union, and it estimates a monetary value in the Eurozone. As a difference to Consumer Index Index Price (CPI), it uses different methodological concept which is used by all EU members.

Oct 11 **month of the current year**
Ø 2010 **average (Ø) month of previous year**

This rate indicates a change in average prices in current month when compared with average prices in previous year.

Oct 11 **current month**
Sep 11 **previous month**

Monthly inflation rate (current month compared with previous month) measures a change of average prices of current months compared with average prices of previous month. Monthly inlfation rate can be under the influence of seasonal effects.

Oct 11 **month of the current year**
Oct 10 **the same month of previous year**

Annual inflation rate (month of the current year compared with the same month of previous year) measures a change in average prices in current month compared with average prices in the same month of previous year.

Oct 11 **month of the current year**
Dec 10 **december of previous year**

This rate indicates a change in average prices in current month compared with average prices in December of previous year.

The influence of certain subgroups on inflation rate indicates how much that subgroup has influenced on the total inflation rate. The influence depends on weights and inflation rate of given subgroup. The weights represents a relative share of household consumption of certain groups or subgroup of products in the total consumption. Consequently, weights have an important role in the calculation of inflation rate. They represent "importance" of certain product group in the total household consumption in certain reference period. For example, if during certain month prices of bread increases for 10%, this will influence for approx. 0.5% (10*5%=0.5% - since the share of bread in the total expenses is 5%). But, if the prices of medicaments increase 12%, this will increase the inflation for 0.06% (12*0.5%=0.06% - since the share of medicaments in the total expenses 0.5%). This simple example indicates how much large influence have weights on the final number presenting the inflation.
