Harmonised Index of Consumer Prices (HICP)
July 2011

Monthly inflation in July decreased -0.6%, while the annual inflation is 3.0%

Monthly inflation measured by Harmonised Index of Consumer Prices decreased -0.6% in July. This was influenced mostly by the decrease in prices of vegetable and fruit. Annual inflation in July is +3.0%, and it is lower than in June when it was +3.9%.

When observing the main groups, monthly growth of prices was noticed in the following groups: Communications (+0.7%); Alcoholic beverages and tobacco (+0.6%); Recreation and culture (+0.1%), while an increase was noticed in the following groups: Food and non-alcoholic beverages(-2.0%); Restaurants and hotels (-0.3%), and Furnishing household equipment and routine household maintenance (-0.1%). Prices in the groups: Clothing and footwear; Housing, water, electricity, gas and other fuels; Health; Transport; Communication; Education and Miscellaneous goods and services remain at the same level as in the previous month.

Positive annual inflation rates in July were observed in the following groups: Alcoholic beverages and tobacco (+15.7%); Health (+11.3%); Transport (+6.7%); Food and non-alcoholic beverages(+3.7%); Communications (+3.0%); Restaurants and hotels (+1.4%), and Recreation and culture (+0.1%), while negative annual inflation rates were observed in the following groups: Housing, water, electricity, gas and other fuels (-2.1%); Clothing and footwear (-1.7%); Miscellaneous goods and services (-1.0%); Furnishing, household equipment and routine household maintenance (-0.3%), and Education (-0.3%).

Harmonised index of consumer prices (HICP), 2010=100

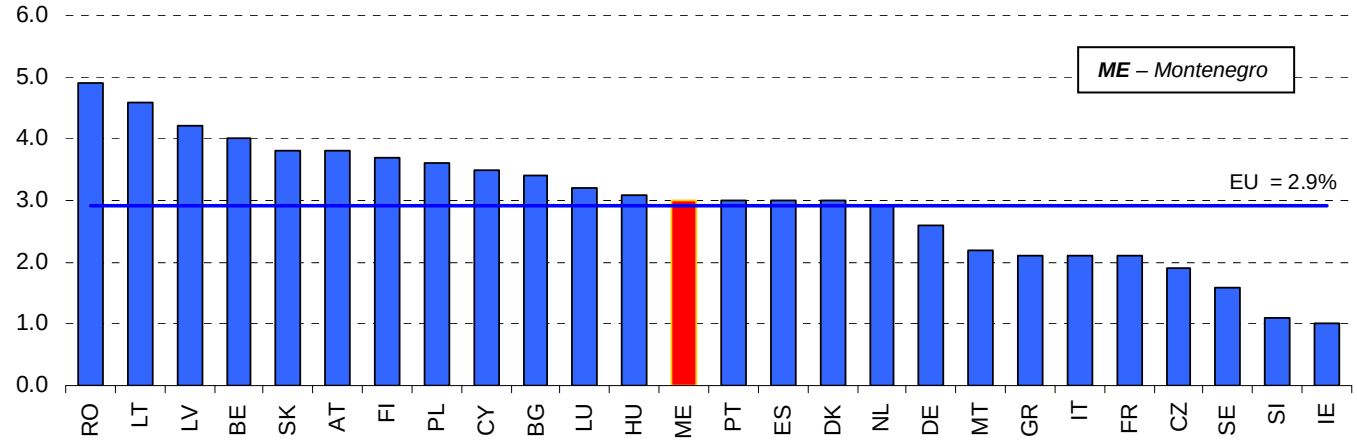
Diagram 2: Annual inflation rate measured by HICP, July 2011



Montenegro annual inflation was 3.0% in July 2011. EU annual inflation was 2.9% in July 2011, while there was 2.5% in the Euro area.

Harmonised Index of Consumer Prices (HICP) is the basis for comparative measurement of inflation in the European Union, and it estimates a monetary value in the Eurozone. As a difference to Consumer Index Index Price (CPI), it uses different methodological concept which is used by all EU members.

Jul 11 **month of the current year**
Ø 2010 **average (Ø) month of previous year**

This rate indicates a change in average prices in current month when compared with average prices in previous year.

Jul 11 **current month**
Jun 11 **previous month**

Monthly inflation rate (current month compared with previous month) measures a change of average prices of current months compared with average prices of previous month. Monthly inlfation rate can be under the influence of seasonal effects.

Jul 11 **month of the current year**
Jul 10 **the same month of previous year**

Annual inflation rate (month of the current year compared with the same month of previous year) measures a change in average prices in current month compared with average prices in the same month of previous year.

Jul 11 **month of the current year**
Dec 10 **December of previous year**

This rate indicates a change in average prices in current month compared with average prices in December of previous year.

The influence of certain subgroups on inflation rate indicates how much that subgroup has influenced on the total inflation rate. The influence depends on weights and inflation rate of given subgroup. The weights represents a relative share of household consumption of certain groups or subgroup of products in the total consumption. Consequently, weights have an important role in the calculation of inflation rate. They represent "importance" of certain product group in the total household consumption in certain reference period. For example, if during certain month prices of bread increases for 10%, this will influence for approx. 0.5% (10*5%=0.5% - since the share of bread in the total expenses is 5%). But, if the prices of medicaments increase 12%, this will increase the inflation for 0.06% (12*0.5%=0.06% - since the share of medicaments in the total expenses 0.5%). This simple example indicates how much large influence have weights on the final number presenting the inflation.
