

Indices of industrial production July 2015

Industrial production in Montenegro in July increased 12.9% for period January-July 2015 compared with the same period of previous year. Compared to average monthly production from previous year industrial production increased 22.8%. Compared with the same month of previous year the production increased 33.6%. Industrial production in Montenegro in July increased 32.9% compared to previous month.

At the sector level, period January-July 2015 compared to the same period of the previous year, there was an increase in the production for the observed period: mining and quarrying 2.5%, manufacturing 20.1% and electricity, gas, steam and air conditioning supply 4.8%.

35	Electricity, gas, steam and air conditioning supply	40.1	103.3	185.5	121.5	104.8

¹ Calculated index is higher than 300.0.

METHODOLOGICAL EXPLANATIONS

Industrial production indices are one of the most important short-term indicators and a basis for decision making in the area of economy.

Monthly report on industry IND-1 provides the data on industrial production (quantity of products produced in the reporting month, from beginning to the end of reporting month, quantities of final products in stocks, sale of final products from beginning to the end of reporting month, value of production in reporting month, number of workers, gross earnings of employees, number of hours worked, value of stock, profit from sale - turnover).

Statistical Business Register (SBR) is used as the frame for the coverage for the purposes of this survey. Reporting units are businesses engaged in the industrial production (sectors B, C and D of Activity Classification), as well as parts of commercial businesses classified into other sectors of Activity Classification, and they satisfy the criteria for this survey.

The data are published according Data publishing calendar, as well as in our website www.monstat.org.
