Indices of industrial production and turnover January 2016

Industrial production in Montenegro in January decreased 16.4% compared to average monthly production from previous year, 14.2% compared to previous month and 12.3% compared with the same month of previous year.

At the sector level, in January 2016 compared to the same month of the previous year, there was an increase in production in manufacturing 3.1%, while the production decreased in: mining and quarrying 15.7% and electricity, gas, steam and air conditioning supply 3.5%.

Industrial turnover in Montenegro in January decreased 35.8% compared to average monthly production from previous year, 20.8% compared with the same month of previous year and 30.0% compared to previous month.

At the sector level, in January 2016 compared to the same month of the previous year, there was a decrease of turnover in mining and quarrying 44.1% and manufacturing 14.7%.

	Energy	112.0	115.0	102.7	89.1
B	MINING AND QUARRYING	72.4	60.4	83.4	55.9
C	MANUFACTURING	95.2	64.9	68.2	85.3

METHODOLOGICAL EXPLANATIONS

Industrial production and turnover indices are one of the most important short-term indicators and a basis for decision making in the area of economy.

Monthly survey on industrial production is harmonised with EU Regulation 1165/98 and Regulation 1502/2006 and the concepts and definition used in this survey are in line with these regulations. Survey provides the data on industrial production (quantity of products produced in the reporting month, from beginning to the end of reporting month, quantities of final products in stocks, sale of final products from beginning to the end of reporting month, value of production in reporting month, number of workers, gross earnings of employees, number of hours worked, value of stock, profit from sale - turnover).

Statistical Business Register (SBR) is used as the frame for the coverage for the purposes of this survey. Reporting units for industrial production indices are businesses engaged in the industrial production (sectors B, C and D of Activity Classification), as well as parts of commercial businesses classified into other sectors of Activity Classification, and they satisfy the criteria for this survey. Reporting units for industrial turnover indices are businesses engaged in the industrial production (sectors B and C of Activity Classification), as well as parts of commercial businesses classified into other sectors of Activity Classification, and they satisfy the criteria for this survey.

Quantities of finished products covered by sections B, C and D of Activity Classification are used for calculation of industrial production index-total. Turnovers in sections B and C of Activity Classification are used for calculation of industrial turnover index-total, according mentioned EU Regulations.

The data are published according Data publishing calendar, as well as in our website www.monstat.org
