Indices of industrial production and turnover February 2018^(p)

Industrial production in Montenegro in February 2018 increased 29.5% compared to same month of previous year.

At the sector level, compared to same month of previous year, industrial production increased in manufacturing 6.2% and in electricity, gas, steam and air conditioning supply 76.3%, while decreased 32.2% in mining and quarrying.

Compared to previous month industrial production in February 2018 increased 13.7%.

C	MANUFACTURING	120.4	120.7	163.7	161.1

METHODOLOGICAL EXPLANATION

Data source, coverage and definitions

Industrial production and turnover indices are one of the most important short-term indicators and a basis for decision making in the area of economy.

Monthly survey on industrial production is harmonised with EU Regulation 1165/98 and Regulation 1502/2006 and the concepts and definition used in this survey are in line with these regulations. Survey provides the data on industrial production (quantity of products produced in the reporting month, from beginning to the end of reporting month, quantities of final products in stocks, sale of final products from beginning to the end of reporting month, value of production in reporting month, number of workers, gross earnings of employees, number of hours worked, value of stock, profit from sale - turnover).

Statistical Business Register (SBR) is used as the frame for the coverage for the purposes of this survey. Reporting units for industrial production indices are businesses engaged in the industrial production (sectors B, C and D of Activity Classification), as well as parts of commercial businesses classified into other sectors of Activity Classification, and they satisfy the criteria for this survey. Reporting units for industrial turnover indices are businesses engaged in the industrial production (sectors B and C of Activity Classification), as well as parts of commercial businesses classified into other sectors of Activity Classification, and they satisfy the criteria for this survey.

Quantities of finished products covered by sections B, C and D of Activity Classification are used for calculation of industrial production index-total. Turnovers in sections B and C of Activity Classification are used for calculation of industrial turnover index-total, according mentioned EU Regulations.

The data are published according Data publishing calendar, as well as in our website www.monstat.org.
