

## Indices of industrial production *April 2012*

*Industrial production in Montenegro in April increased: 11.0% compared to average monthly production from previous year, 6.8% compared with the previous month and 20.8% compared to same month of the previous year while it decrease 7.1% for period January-April 2012 compared with the same period of previous year.*

*At the sector level, period January-April 2012 compared to the same period of the previous year, there was an increase in the production only in manufacturing 11.6%, while it decreased in two sectors: mining and quarrying 12.5%, and electricity, gas, steam and air conditioning supply 27.4% for the observed period.*

## METHODOLOGICAL NOTES

Industrial production indices are one of the most important short-term indicators, and a basis for decision making in the area of economy.

Monthly report on industry IND-1 provides the data on industrial production (quantity of products produced in the reporting month, from beginning to the end of reporting month, quantities of final products in stocks, sale of final products from beginning to the end of reporting month, value of production in reporting month, number of workers, gross earnings of employees, number of hours worked, value of stocks, profit from sale - turnover).

Statistical Business Register (SBR) is used as the frame for the coverage for the purposes of this survey. Reporting units are businesses engaged in the industrial production (sectors B,C and D of Activity Classification), as well as parts of commercial businesses classified into other sectors of Activity Classification, and they satisfy the criteria for this survey.

The data are published on the 15<sup>th</sup> in a month for the previous one, as well as in our website [www.monstat.org](http://www.monstat.org).
