

Unit Value Indices (UVI) of exported and imported goods Year 2018

Unit values of goods exported from January to December 2018 decreased by 0.1% compared with the same period of previous year.

From January to December 2018, compared with the same period of previous year, unit values of goods imported increased by 2.5%.

From January to December 2018, when observing chapters of customs tariffs, the highest rise of unit value of goods exported of 75,7% was noticed under Chapter 89: Ships, boats and floating structures, the highest rise of goods imported 79,5% was noticed under Chapter 50: Silk.

Works of art, collectors' pieces and antiques	99.2	100.0	128.5	69.2	77.2	144.4

METHODOLOGICAL EXPLANATIONS

Unit value indices of exported and imported goods are aimed at analytical measuring the dynamics of unit values of export and import, and they are also used as a deflator in Gross Domestic Product calculation.

The data source for unit value index calculation are collective customs declarations on export and import of goods which are monthly transmitted to Statistical Office of Montenegro by Customs Administration of Montenegro, and used for regular statistical survey in the foreign trade of Montenegro.

Indices of exported and imported prices are calculated as Unit Value Indices (UVI), i.e. changes indices of export and import values per quantity unit of products exported and imported, i.e. per kilogram as a standard and comparable quantity unit for all products.

Indices are calculated by Fisher formula, as an arithmetic average between Laspeyres and Paasche formulas, i.e.

Laspeyres index = $(\sum p_1 * q_0 / \sum p_0 * q_0) * 100$,

Paasche index = $(\sum p_1 * q_1 / \sum p_0 * q_1) * 100$ i

Fisher index = $\sqrt{\text{Laspeyres} * \text{Paasche}}$

Where:

p_0 unit value from previous period,
 p_1 unit value from current period,
 q_0 quantity from previous period and
 q_1 quantity from current period.

Relations of exchange are relations between export and import of unit values.

Processing excludes products with the value under 1 000 EUR, where is unit value of current year twice or more higher in comparison with previous year and vice versa, where is the quantity of current year 10 times or more higher in comparison with previous year and vice versa.

The data are presented by chapters of customs tariff, i.e. Harmonised system of names and codes of goods.
