METHODOLOGICAL NOTES

Internal trade statistics covers and presents turnover of enterprises with the retail trade as their main activity.

The data on internal trade of enterprises engaged in the retail trade are collected by regular monthly survey. The survey is based on the sample and covers enterprises classified in area 47 in accordance with Activity Classification.

Turnover of goods in retail trade represents the value of goods of enterprises sold to final consumers. i.e. population for personal consumption and household use as well as to legal and natural persons for performing industries.

Indices of turnover of goods in constant prices are received by deflating index in current prices by appropriate indices of retail goods prices.

The last published data are considered **preliminary**, and becomes final within the defined deadline, as foreseen by the Statistical Release Calendar.
