## METHODOLOGICAL NOTES

Since 2017 the methodology for calculating individual accommodation, in the process of data collection and processing, has included the following data sources: administrative databases (Local Tourism Organizations, Ministry of the Interior, Ministry of Sustainable Development and Tourism, National Tourism Organization, Secretariats of Local Self-Government) and statistical sources and records. The newly established administrative data sources are the result of new legislation, such as the register of residence registration (ie. Database RB90) under the jurisdiction of the Ministry of the Interior (regulated by the Law on Foreigners).

Non-registered tourists are not subject of this survey.

The aim of the survey on tourist arrivals and overnight stays in the individual / private accommodation is to provide basic information about the scope of traffic (arrivals and overnight stays) of domestic and foreign tourists.

The survey collects data on:

- number of arrivals and overnight stays of domestic and foreign tourists in individual / private accommodation establishments including accommodation in houses and rooms for rent as well as tourist apartments;
- structure of arrivals and overnight stays of foreign tourists by country of residence in individual / private accommodation establishments.

The survey covers all official data of catering establishments in the territory of Montenegro which provide accommodation services in houses and rooms for rent, as well as tourist apartments.
