Podgorica, 22. 07. 2010

PRVI REZULTATI POPISA POLJOPRIVREDE 2010. GODINE
ZA PORODIČNA POLJOPRIVREDNA GAZDINSTVA

Zavod za statistiku, u periodu od 07.–21.06.2010. godine sproveo je Popis poljoprivrede, prvi u Crnoj Gori poslije 50 godina.

Zavod za statistiku objavljuje prve rezultate Popisa poljoprivrede 2010 za porodična poljoprivredna gazdinstva i uporedni pregled sa podacima iz Popisa stanovništva, domaćinstava i stanova 2003 godine.

METODOLOŠKA OBJAŠNJENJA, POPIS POLJOPRIVREDE 2010. GODINE

UVOD

Popis poljoprivrede je sproveden u periodu od 07. - 21. 06. 2010. godine, u skladu sa Zakonom o popisu poljoprivrede 2010. godine (objavljen u Sl.list. CG br. 54/09, 14/10) .
Popisivanje porodičnih poljoprivrednih gazdinstava izvršeno je metodom intervjua „od vrata do vrata''. Podaci su prikupljeni od strane popisivača koje je izabrala Agencija za izbor i plaćanje (ASA institut - ugovarač iz Kelna, njemacka i crnogorska kompanija Praksis Montenegro), a obučeni su od strane Zavoda za statistiku koji je pripremio metodologiju i obrasce.
Poslovni subjekti su popisani „poštanskom metodom''. Podaci za poslovne subjekte biće objavljeni naknadno.
Metodologija je usklađena sa Regulation (EC) No 1166/2008; Handbook on implementing the FSS and SAPM definitions.

U periodu od 25. juna do 05. jula 2010. godine Zavod za statistiku sproveo je post popisno istraživanje Kontrola kvalteta i obuhvata popisa poljoprivrede. Metodologija ocjene kvaliteta rezultata Popisa poljoprivrede urađena je od strane nezavisnog eksperta g-dina Bruna Masolija, kroz Midas projekat. Rezultati post popisnog istraživanja pokazali su da je Popis realizovan u skladu sa metodologijom i da su odstupanja u obuhvatu i kvalitetu podataka prikupljenih popisom i post popisnim istraživanjem statistički neznačajna, odnosno nalaze se u zadovoljavajućim intervaluima odstupanja.

OSNOVNE DEFINICIJE

"Porodično poljoprivredno gazdinstvo je gazdinstvo koje koristi najmanje 1000 m^2 poljoprivrednog zemljišta ili manje od 1000 m^2 poljoprivrednog zemljišta, a posjeduje: 1 kravu i 1 tele, ili 1 kravu i 1 june, ili 1 kravu i 2 odrasla grla sitne stoke, ili 5 odraslih ovaca ili koza, ili 3 odrasle svinje , ili 4 odrasla grla ovaca, koza ili svinja zajedno, ili 50 komada odrasle živine, ili 20 košnica pčela).
Obuhvatiće se i ona domaćinstva koja imaju poljoprivrednu proizvodnju, a ne ispunjavaju gore navedene uslove za poljoprivredno gazdinstvo, ukoliko je poljoprivredna proizvodnja jedini izvor prihoda za to domaćinstvo. Popisom će se obuhvatiti i domaćinstva koja ne zadovoljavaju navedene uslove, ali se bave uzgojem pečurki u specijalizovanim objektima.

Ukupno raspoloživo zemljište je površina zemljišta (ukupnog, poljoprivrednog korišćenog, poljoprivrednog nekorišćenog, šumskog i neplodnog) izražena u ha i m^2 za svako domaćinstvo koje posjeduje zemlju bez obzira da li je koristi ili ne i da li to domaćinstvo ima gazdinstvo. Ukupno raspoloživo zemljište predstavlja zbir površina zemljišta u vlasništvu, zemljišta uzetog u zakup umanjenog za površine date u zakup.

Ukupno korišćeno poljoprivredno zemljište je površina korišćenog poljoprivrednog zemljišta (okućnice, oranice- uključujući ugare, vinogradi, voćnjaci, rasadnici, livade i pašnjaci). Ukupno korišćeno poljoprivredno zemljište predstavlja zbir površina poljoprivrednog zemljišta u vlasništvu, poljoprivrednog zemljišta uzetog u zakup umanjenog za površine poljoprivrednog zemljišta koje su date u zakup.

Ukupno nekorišćeno poljoprivredno zemljište je površina: poljoprivrednog zemljišta koje se ranije koristilo kao poljoprivredno, ali u referentnoj godini se ne koristi (iz ekonomskih, socijalnih i drugih razloga i nije uključeno u rotaciju kultura) i poljoprivrednog zemljišta u zarastanju. Ukupno nekorišćeno poljoprivredno zemljište predstavlja zbir površina poljoprivrednog zemljišta u vlasništvu, poljoprivrednog zemljišta uzetog u zakup umanjenog za površine poljoprivrednog zemljišta koje su date u zakup".

Knjiga Prvi rezultati popisa poljoprivrede 2010 (za porodična poljoprivredna gazdinstva i poslovne subjekte) biće objavljena do septembra 2010. godine.

MONTENEGRO
STATISTICAL OFFICE
PRESS RELEASE
No: 68
Podgorica, 22 July 2010

CENSUS OF AGRICULTURE 2010
FIRST RESULTS
FOR AGRICULTURAL HOLDINGS

Statistical Office of Montenegro – Monstat conducted the Census of Agriculture, the first one in Montenegro after 50 years, from 7 to 21 June 2010.

Monstat is publishing the first results from the Census of Agriculture 2010 for family agricultural holdings and comparative review with the data from the Census of Population, Households and Dwellings 2003.

METHODOLOGICAL EXPLANATIONS, CENSUS OF AGRICULTURE 2010

INTRODUCTION

The Census of Agriculture was conducted from 7 to 21 June 2010 in accordance with the Law on Census of Agriculture 2010 (published in the Official Gazette of Montenegro 54/09, and 14/10).
The enumeration of family agricultural holdings was conducted by the interview "door-to-door'' method. The data were collected by the enumerators selected by the Agency for Selection and Payment (ASA Institut – the contractor from Cologne, German and Montenegrin Company Praxis Montenegro), and trained by the Statistical Office of Montenegro – Monstat who prepared methodology and questionnaires.
Business subjects were enumerated by the "postal method ''. The data on business subjects shall be published later.
The methodology is harmonised with the Regulation (EC) No 1166/2008; Handbook on implementing the FSS and SAPM definitions.

From 25 June to 5 July 2010 Statistical Office of Montenegro – Monstat conducted the post enumeration survey Quality and Coverage Control of Agricultural Census. The methodology for the quality data control from the Census of Agriculture was drafted by Mr. Bruno Massoli under the Midas project. The results from the post enumeration survey showed that the Census was conducted in accordance with the methodology and that deviations in coverage and data quality collected by the census and post enumeration survey are statistically insignificant, i.e. they are within the satisfying deviation intervals.

BASIC DEFINITIONS

Family agricultural holding is a holding using at least 1,000 m^2 of agricultural land or less than 1,000 m^2 and possesses: 1 cow and 1 calf or 1 cow and 1 heifer or 1 cow and 2 adult small stock heads or 5 adult sheep or goats or 3 adult pigs or 4 adult heads of sheep, goats or pigs together or 50 heads of adult poultry or 20 beehives).
Also, households with agricultural production and which do not fulfil the above mentioned conditions for agricultural holding, if agricultural production is the only source of incomes for those households. Households not fulfilling the above mentioned conditions, but they cultivate mushrooms in buildings specially erected for growing mushrooms.

Total available land is an area of land (total, agricultural utilised, agricultural not utilised, wooded and infertile) is entered in ha and m^2 measures for every household owning the land no matter if it is utilised or not, and if this household has holding. Total available land is the sum of the area of land owned, land taken in tenure reduced for the areas rented out (given in tenure).

Total utilised agricultural land is an utilised agricultural area (kitchen gardens, arable land – including fallow land, vineyards, orchards, nurseries, meadows and pastures). The total utilised agricultural land is the sum of agricultural area owned; agricultural land rented from someone else less agricultural areas given for tenure.

Total unutilised agricultural land is an area previously used as an agricultural area and, during the reference year no longer worked for economic, social or other reasons and which is not used in the crop rotation system, and area overgrowing are entered under this heading. The total unutilised agricultural land is the sum of unutilised agricultural land owned, unutilised agricultural land taken in tenure less unutilised agricultural areas given in tenure.

The publication *First results of the Census of Agriculture 2010 (for family agricultural holdings and business subjects)* shall be published in September 2010.
